

# Financial viability and economic impact: At the heart of decision-making for infrastructure development

CPCS delivers customized analyses and develops bespoke financial models to understand project risks, evaluate financial options and drive informed decision-making.

## How we help clients:

- **Project finance structuring and modelling** for infrastructure financial solutions and transaction implementation
- **Cost-benefit analysis** for social and economic impact appraisal
- **Risk assessment** for feasibility and value for money analysis
- Project and corporate **financial due diligence** to support restructuring and development
