A high-impact
career you likely
didn't think of.

Global projects. Real responsibilities. High-impact work.

“ I am currently working on a project that involves conducting interviews with marine ports to assess infrastructure gaps, analyzing survey data, and drafting a report that highlights investment opportunities in the marine sector.

The project aims to address critical infrastructure challenges, which are essential for fostering economic growth and enhancing supply chain resilience.”

Alistair Bell
Consultant, Canada
(program graduate)

“ The solar PV market analysis I am conducting for conflict and post-conflict countries addresses unique financial, regulatory, and security risks. It emphasizes the need to rethink business models to attract private investment and create new pathways for sustainable development.”

Leina Benouniche
Senior Consultant, Africa
(program graduate)

“ I am conducting a market analysis on prospective investment opportunities in major energy and transportation infrastructure projects in Canada.

Through this work, I've gained a deeper understanding of the Canadian infrastructure landscape, investment considerations, and the diverse mechanisms through which energy and transportation projects are financed and implemented.”

Matthew Lam
Junior Consultant

A career in management consulting at CPCS.

Interested in finding solutions to tough infrastructure challenges?

You'll catch our attention if you have a background in economics, management, finance, law, data science, engineering, urban planning or other disciplines relevant to our field.

Global expertise

CPCS is a global management consulting firm headquartered in Canada. We provide strategic advisory services specific to transportation and power infrastructure, operations, investment, policy and regulation.

We also specialize in mobilizing private investment for public infrastructure through public-private partnerships and transaction advisory services.

The clients we partner with include all levels of government, private sector investors and infrastructure owners, bilateral and multilateral agencies, as well as international financial institutions such as the World Bank.

What you'll do with us:

Learn

the ins and outs of business development.

Lead

all aspects of strategic, economic and financial analyses for infrastructure projects specific to transport, power and public-private partnerships.

Consult

with a wide range of stakeholders, present the findings in high-level meetings across the world.

Work

with teammates to identify data-driven and impactful solutions to tough infrastructure issues.

Your path at CPCS

1

You'll join our central consulting team, be trained and do hands-on work to support business development and project activities across our areas of expertise and markets.

2

Successful individuals graduating from our program move to a specialized team that meets their career development goals and business priorities.

Over **1,700+** projects completed
in more than **120*** countries.

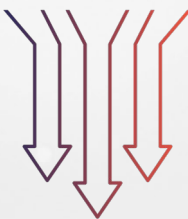

Architecture, engineering and planning firms

Technical advisory,
detailed planning
and design

Accounting and management consulting firms

Management
consulting

**Strategic, policy and economic
advisory** and strategic development
of transportation projects underpinned
by deep subject matter expertise.

Impactful stories we get to tell.

- Helping a North American transport agency solve urban freight challenges.
- Guiding a government to take its first steps in renewable energy to meet growing energy demand.
- Mobilizing public and private investments to start an initiative for coastal protection in Africa.
